

PARASITOLOGY

Boehringer Ingelheim welcomes collaborations with partners in **parasitology**, who share our passion for improving the health and wellbeing of animals, to help us find solutions to some of the biggest challenges in animal health today.

Pursuing Innovation

- Building on our global leadership in parasitology
- Research focus on a range of parasite solutions for a variety of species with an emphasis on: Endoparasites | Prevention/treatment of vector-born diseases (ectoparasites) | Improved prevention/treatment of coccidia
- Opportunities to build on established brands with novel formulations and combination approaches.

Actively pursuing new partnerships in our areas of interest and open to a variety of partnership models to explore:

- Prevention of canine heartworm disease
- Treatment of GI nematodes in pets and livestock
- Ectoparasites in all host species
- Coccidia in poultry and ruminants
- Fluke in ruminants.
